## Syntax Snippets

Scalars	<pre># scalar = value a: 1 a: 1.234 b: 'abc' b: "abc" b: abc c: false      # boolean type d: 2015-04-05 # date type  # Enforcing strings b: !str 2015-04-05</pre>
Sequences	<pre># sequence array: - 132 - 2.434 - 'abc'  # sequence of sequences my_array: - [1, 2, 3] - [4, 5, 6]</pre>
Hashes	<pre># Nested hash my_hash:   subkey:     subsubkey1: 5     subsubkey2: 6   another:     somethingelse: 'Important!'  # Hash of hashes my_hash: {nr1: 5, nr2: 6}</pre>
HereDoc	<pre># block notation (newlines become spaces) content:   Arbitrary free text   over multiple lines stopping   after indentation changes...  # literal style (newlines are preserved) content:     Arbitrary free text   over "multiple lines" stopping   after indentation changes...  # + indicator (keep extra newlines after block) content:  +   Arbitrary free text with two newlines after  # - indicator (remove extra newlines after block) content:  -</pre>

CHEAT SHEETS			<pre>Arbitrary free text without newlines after it  # folded style (folded newlines are preserved) content: &gt;   Arbitrary free text   over "multiple lines" stopping   after indentation changes...</pre>
